Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

Problem Statement:

The current IT procurement process lacks efficiency and automation, resulting in delays and manual overhead, particularly in handling standard laptop orders. Requests for standard laptops often require configuration, but this step is prone to oversight or delay, leading to frustration among users and inefficient resource allocation within the IT department.

User Story:

As a member of the IT procurement team, I want a streamlined process for ordering standard laptops so that tasks are automatically generated and assigned to the hardware team for

configuration. This will ensure that laptops are promptly configured upon arrival, reducing user wait times and minimising manual intervention.

Project Objective:

The objective of this project is to implement an automated workflow using Flow Designer to facilitate the procurement and configuration of standard laptops. By integrating automation into the process, the project aims to:

1. Create a seamless experience for users requesting standard laptops by ensuring timely configuration.
2. Reduce manual intervention and potential errors in the procurement process.
3. Improve resource utilisation within the IT department by optimising task allocation.
4. Enhance overall efficiency and productivity in IT procurement operations.

TASK INITIATION

Milestone 1 : Flow

Activity 1: Create a Flow to Create Catalog task to update the short description after Approval the service Request and it will be Assignment group to Hardware.

1. Open service now.
2. Click on All >> search for Flow Designer
3. Click on Flow Designer under Process Automation.
4. After opening Flow Designer Click on new and select Flow.
5. Under Flow properties Give Flow Name as “ Standard laptop task”.
6. Application should be Global.

7. Select Run user as “System user” from that choice.
8. Click on Submit.

The screenshot shows the ServiceNow Flow Designer table view. The table lists flows with columns for Name, Internal name, Application, Status, Active, Updated, and Updated by. A 'New' button is visible in the top right corner, and a dropdown menu is open showing options: Flow, Subflow, Action, and Data Stream.

	Name	Internal name	Application	Status	Active	Updated	Updated by
☐	Standard Laptop task	standard_laptop_task	Global	Published	true	2024-04-16 23:33:53	admin
☐	Email Sending For P1	email_sending_for_p1	Global	Published	false	2024-04-16 04:22:31	admin
☐	Daily Task Reminder	daily_task_reminder	Global	Draft	false	2024-04-16 00:08:03	admin

Conclusion :

By automating the standard laptop procurement process with ServiceNow's Flow Designer, the project effectively addresses inefficiencies and reduces manual overhead. This streamlined workflow ensures timely configuration of laptops, minimizes user wait times, and enhances overall productivity within the IT department. The implementation of this automated solution not only optimizes resource allocation but also significantly improves the user experience by providing a seamless and efficient procurement process.
